

MEMORANDUM FOR: Special Assistant/Planning and Coordination

SUBJECT : Representation on Special Rockefeller Committee
under NSC 5505

1. On January 27, the President approved NSC 5505, setting forth policy with respect to the exploitation of Soviet and European Satellite vulnerabilities, and designated as coordinating agency for this policy a Special Committee. This Special Committee will be chaired by Mr. Nelson Rockefeller, and its basic members will be the Under Secretary of State, Deputy Secretary of Defense, and myself.

2. The President has provided that members of the Special Committee may be represented in day-to-day operations by deputies appointed by them. Accordingly I am designating you as my representative for this purpose.

3. For my own guidance, I would appreciate it if you would undertake a prompt review of CIA's operating programs in the light of NSC 5505, and would advise me of the extent to which they are now consistent with that policy, what modifications might be necessary, and what additional programs you would recommend in order to carry out the policy most effectively.
